

Lakshmi Sree Kella

Software Engineer QA

9390082224

kellalakshmisree@gmail.com Bengaluru

SUMMARY

Results-driven QA Engineer with 4 years of experience in Manual Testing, Functional Testing, Automation Testing, and API Testing for enterprise and web applications in Agile environments. Skilled in designing and executing comprehensive test plans, test cases, regression suites, and functional validation processes to ensure software quality and reliability. Hands-on experience with Selenium WebDriver, Java, TestNG, JUnit, Jira, Postman, SQL, Jenkins, Maven, and CI/CD pipelines. Proficient in defect identification, tracking, root cause analysis, and collaborating with cross-functional teams to resolve issues efficiently. Strong understanding of SDLC, STLC, quality assurance methodologies, and automation framework development using Page Object Model (POM) and Hybrid Frameworks.

SKILLS

QA Testing Skills:

Manual Testing: Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, System Testing, User Acceptance Testing (UAT), API Testing, Usability Testing, Defect Tracking & Reporting, Test Case Design & Execution, Test Planning & Test Strategy

Automation Testing: Selenium WebDriver, TestNG, JUnit, Playwright (Basic), Cucumber BDD, Page Object Model (POM), Hybrid Framework, Data-Driven Framework, Maven, Cross-Browser Testing

Programming & Database: Core Java, JavaScript, SQL, MySQL

API & Tools: Postman, REST Assured (Basic), SOAP UI (Basic), Jira, Jenkins, Git, GitHub

Methodologies: Agile Scrum, SDLC, STLC, Defect Lifecycle Management, CI/CD Processes

Additional Skills: XPath & CSS Selectors, Dynamic Web Element Handling, Root Cause Analysis, Defect Tracking, Troubleshooting, Analytical Problem Solving, Test Case Design, Team Collaboration, Knowledge Sharing

WORK EXPERIENCE

E-Commerce Web Application Automation Testing

QA Engineer

📅 01/2024 - Present

📍 Bengaluru

- **Technologies:** Selenium WebDriver, Java, TestNG, Maven, Git, POM

Project Description & Responsibilities:

- Responsibilities:
- Designed and executed comprehensive test plans and test cases for web application modules using functional testing methodologies.
- Developed and maintained automation test scripts using Selenium WebDriver, Java, TestNG, and Maven.
- Performed Functional, Regression, Smoke, Sanity, and Cross-Browser Testing for critical business workflows.
- Collaborated with developers to identify, reproduce, analyze, and verify software defect resolutions.
- Logged and tracked defects using Jira while ensuring adherence to defect management processes.
- Enhanced automation coverage by implementing reusable components using Page Object Model (POM).
- Executed automated test suites through Jenkins CI/CD pipelines to improve testing efficiency.
- Participated in Agile ceremonies, test reviews, and continuous improvement discussions.
- Generated detailed execution reports and shared quality metrics with stakeholders.

Banking Application Functional & Manual Testing

Manual Test Engineer

📅 09/2022 - 12/2023 📍 Bengaluru

- **Technologies:** Jira, SQL, Agile Methodology, Excel, Test Case Management, Postman

Project Description & Responsibilities:

- Analyzed business requirements and created detailed functional test scenarios and test cases.
- Performed Functional, Integration, Regression, System, and UAT testing for banking applications.
- Conducted API validation testing using Postman and validated backend data using SQL queries.
- Identified, documented, and tracked software defects using Jira.
- Collaborated with development teams to reproduce issues and validate fixes effectively.
- Ensured quality assurance compliance across critical banking workflows and edge-case scenarios.
- Participated in sprint planning, requirement reviews, and defect triage meetings.
- Contributed to process improvements and testing best practices within Agile environments.

Professional Experience

Capgemini Technology Services — *Software Engineer QA*

Bangalore, India | Sep 2022 – Present

- Executed 5000+ manual and automation test cases for enterprise web applications, identifying critical defects and reducing production issues.
- Developed and maintained automation test scripts using Selenium WebDriver with Java and TestNG.
- Built reusable automation components using Page Object Model (POM) and Hybrid Framework design patterns.
- Performed UI automation testing using Playwright with JavaScript for critical business workflows. Conducted Functional, Regression, Smoke, Sanity, Integration, and User Acceptance Testing (UAT).
- Collaborated with developers, business analysts, and operations teams to troubleshoot complex application issues and validate fixes.
- Participated actively in Agile sprint planning, daily stand-ups, sprint reviews, retrospectives, and defect triage meetings.
- Conducted REST API testing using Postman and validated request/response payloads, headers, parameters, and status codes.
- Performed backend database validation using SQL queries to ensure data consistency and business rule compliance.
- Executed cross-browser testing across Chrome, Firefox, and Edge browsers. Integrated automation execution with Jenkins CI/CD pipelines for continuous testing.
- Logged, tracked, and managed defects using JIRA throughout the defect lifecycle.
- Assisted in continuous improvement of automation frameworks and testing processes to enhance execution efficiency.
- Prepared test execution reports, defect metrics, and quality dashboards for release readiness.
- Supported junior team members by sharing automation framework knowledge and troubleshooting guidance.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

Aditya Degree College Kakinada

Affiliated to Adikavi University Rajahmundry

Graduated: 2022

CERTIFICATIONS

-
- Selenium with Java – Automation Testing (Udemy, 2024)
 - REST API Testing with Postman (Udemy, 2024)
 - Microsoft Certified: Azure Fundamentals (AZ-900). Microsoft Certified: Azure Administrator Associate (AZ-104)
